

ALL applications and data entry are NOT secure from keyloggers, screen capture and other malware... endpoint threat detection & response solutions are NOT enough.

Protect your employees, suppliers and clients **NOW.**

SentryBay Armored Client

The final piece of the endpoint security puzzle installed in 3 clicks!

...trusted by banks, governments, healthcare, legal and corporates globally

If you can answer YES to at least one question below then please read on:

- Do you use Citrix or VMware or other remote access solutions for desktop and application access from corporate and non-corporate devices?
- Do you want to protect your brand and prevent financial penalties due to the lack of stringent cyber-security at the endpoint?
- Do you, your customers or third party suppliers transact sensitive financial or personal data via a website?
- Do you use AntiVirus and Endpoint Detection and Response (EDR) solutions that have to monitor, detect and respond to the threats?

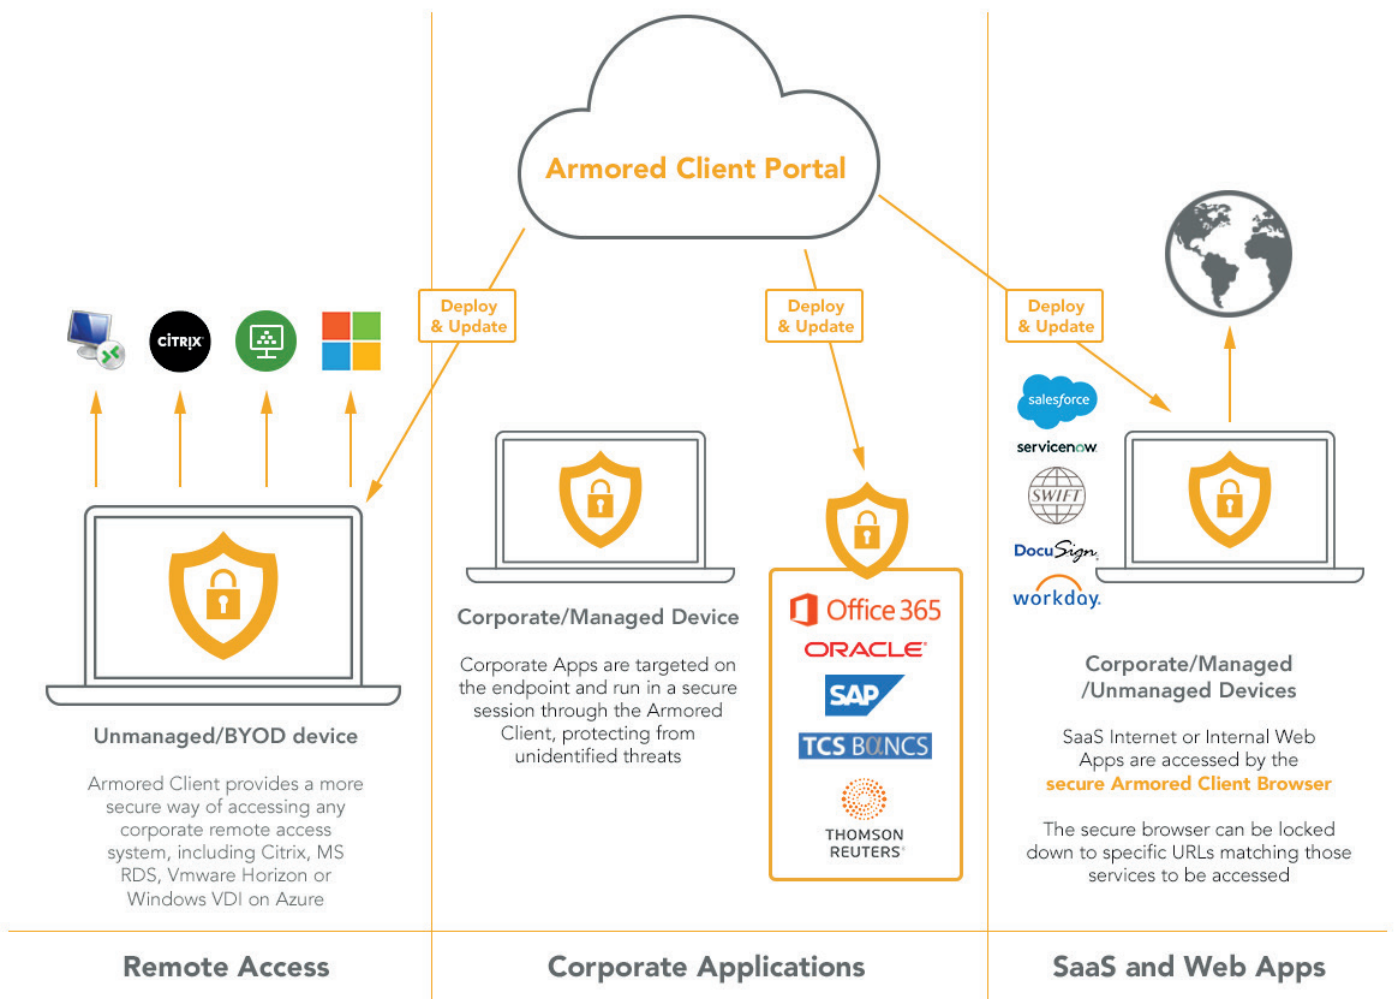

- 42% of all endpoints are unprotected at any given time
- 70% breaches originate at the endpoint
- number one ranked malware is spyware keyloggers
- 230,000 new malware created every day
- 5 million data records are stolen every day

SENTRYBAY ARMORED CLIENT

The SentryBay Armored Client solves the key security challenges without additional infrastructure, complicated configuration and management.

It provides real time patented protection to applications & data without needing to detect & respond to threats... kernel level prevention of data exfiltration even if the threats exist **combined with the secure wrapping of applications and injected security**including customisable secure Armored Client Browser.

PROTECT YOUR ENDPOINT DEVICES FROM:

Key-Logging

Screen Captures

Session Hijacking

Other malware attacks

WHILST PROVIDING:

- Protection of logon credentials and the entire session activity
- Protection of sensitive data into local applications eg Office
- Elimination of browser compatibility issues
- Automatic updates
- Ease of deployment and enforcement
- Complements existing security solutions – AV & EDR
- Reduced support and operational costs
- Regulatory Compliance - Mitigate data breaches and potential financial penalties

ARMORED CLIENT BROWSER

ARMORED CLIENT

CUSTOMISABLE
Secure Branded Browser

ENHANCED SECURITY PROTECTIONS
URL whitelisting, certificate checking, prevention of MITM, MITB, Phishing and many more...

BUILD TRUST
branded "data scrambler" ...provides visual security & trust

COMPLIANCE
GDPR, PCI, PSD2, HIPAA and many more...

SentryBay software replaces the actual keystrokes with fake random keys which the keylogger malware receives – displayed as a "data scrambler" to demonstrate the protection provided

Security that works
